

# LiYv-sr AWG 20 - 24 for solderless connections Marshalling wire

## Construction

- Conductor: copper wire, tinned
- Core insulation: SR-PVC (semi-rigid)
- Shore hardness: min. 95 Shore A

## Technical Data

- Temperature  
range moved: -10°C to +105°C  
range static: -30°C to +105°C

*On request in 600 Volt version available.*

*This hook up wire is used for insulation displacement technology (IDC). The outer diameters are matched for processing tools of the contact manufacturer.*
