

Glass fibre wire pure nickel 400V, 1,50mm², +450°C

Construction:

- Conductor: Wire of pure nickel wire
- Construction: 30 x 0.25mm A = 1.50mm²
- Conductor diameter: approx. 1.65mm
- Isolation: E-glass silk wrapping, 4 layers
environmentally friendly silicone-based impregnation
E-glass silk braiding
environmentally friendly impregnation on silicone-basis
Outer diameter: 3.30 + 0.10mm
- Core coding: natural

Technical specifications:

Rated voltage: 400V
Breakdown test voltage: 2000 V
Temperature resistance: permanently unmoved 450 ° C
Weight: about 28kg / km

Physiologically harmless halogen and solvent free

At a prolonged temperature above 300 ° C escapes the silicone impregnation
