

Thermoline LX - (SCX)SGP 4x0,75 + 3x0,75

Construction:

- Thermo extension alloy Fe-CiNi, type LX (DIN 43714), 4x0,75qmm (24x0,20 mm)
- Core insulation: silicone rubber, diameter 2,10 mm +/- 0,10 mm, layered bunch
- Screen braid made of tin plated copper wires, polyester protective tape
- Tin plated copper strands, 3x0,75 qmm (24x0,20mm)
- Core insulation: silicone rubber, diameter 2,35 +/- 0,10 mm, bunched with thermo wire cores
- Sheath: silicone rubber, outer diameter 12,20 +/- 0,40 mm, colour of sheath: rust
- Braid made of E-glass fibres
- Outer braid made of galvanized steel wires, outer diamter 14,00 mm +/- 0,40 mm

Technical specifications:

- Operating voltage: copper wires 300/500 V
- test voltage: thermo pairs 500 V, copper wires 2000 V
- Operating temperature of insulation: -50°C to +180°C
