

FEP with UL 1333 CSA AWM I A/B 150°C 300V FT2 7-wires

Construction

- conductor: 7 wire, tinned copper
- conductorisolation: Teflon FEP

Technical Data

- operating voltage: 300 V
- temperature range: -60°C bis +150°C
- Bending radius min.: 6 x outer diameter

Properties

- excellent chemical, oil and petrol resistance
- excellent behavior against environmental influences such as ozone, UV radiation, exposure to moisture and large temperature fluctuations
- the strands are non-flammable and environmentally neutral
